NAVIGATE

Monthly Newsletter

REMINDER

Navigate is term based, therefore, any transfer work including AP/IB credit, major changes, especially for new students, will not appear in Navigate until the term has changed in Banner.

NEW TAG

To help identify all new students for the incoming fall 2020 term, a new tag has been created called *Entering Fall 2020 Cohort*. This can help assist when pulling data with advanced search if you want to look for new students only in certain categories of data.

Top user within the platform for the month of June 2020 is Rachel Morgante-Richmeier from Biological Sciences with the most active time on Navigate!

CHANGES COMING TO THE REPORTING ICON

The reports feature within Navigate, which allows you to run reports on the activity that takes place in Navigate, is getting an update. The current reports in Navigate (Legacy) will be phased out on July 17th. The new reports (V2) are currently available under the reporting tab as of July 14th. See the changes to reports **HERE**.

REMINDER

All orientation service constraints that were requested will be removed and reverted back to their original constraint configurations the week of August 3rd.
