NEW! VT Tech Talks

Is there an innovative way you are using existing VT Technology that you want to teach other advisors about? Fill out [THIS FORM](#) and let us know!

On Your Radar

In a survey issued to Virginia Tech advisors last year, 94% of the respondents reported that they are responsible for two or more duties outside of traditional advising caseload management. Knowing all of these responsibilities, each month the Case Management Implementation Committee of the [Advising Strategic Plan](#) will provide advisors with tips and tools related to [case management](#) that we hope are applicable to a wide range of these reported duties.

- May 24th: Summer classes begin for part of term 1 and 3
- June 14 - July 23: Orientation

[New Student Academic Advising website](#) launched to help support students through their advising experience at VT. As this website becomes a hub for students, we will be adding new items for the start of the fall semester
